

## Team Request - Technical Justification

**Title of project for which team account is being requested**

**Please provide a brief technical justification describing the project goals, the planned analysis, and the approximate scope and duration of the work.**

**\*\* Notes**

- *Team creation requests are reviewed on a rolling basis, and responses are expected on a timescale of up to 2 weeks. The response will be communicated to the email of the team administrator*
- *All new teams starting in 2026 are assigned a default credit allocation of 500 credits; teams will be able to request additional credit allocations by submitting a Nexus Credit Request Form. Team admins are responsible for adding team members to their accounts.*
- *All team members are required to have a MyST account to work in the Nexus.*
- *Team usage policies are described at <https://roman-docs.stsci.edu/data-handbook/roman-research-nexus>.*
- *The information submitted in this form is used only to create a team account and track high level metrics.*
- *New team requests are approved pending availability of NASA funding.*
- *We reserve the right to not approve team requests if an already existing team with the same members is performing a similar project.*
